

Classes to be Held at The 7th Annual Tom Ferguson Southeast Texas Trade Show and Crawdad Boil

Thursday, May 5th, 2011

Identifying, Repairing, and Replacing New Metals in Today's Cars

Taught by: Brian Flannery

PRO SPOT
QUALITY WELDING SYSTEMS

This will be a class on how to identify, work with, and replace today's new metals such as AHSS, HSS, Boron, Aluminum, and more. We will cover identifying the metal, discuss which vehicles and where they are found. Then we will discuss proper metal working techniques on each of these substrates. Finally we will talk about how to weld these new metals correctly and the effects of improper repair techniques.

How to Run the Very Best Body Shop

Taught by: Scott Rome

Learn About:

- Blueprinting
- Parts Management
- Dispatching
- Production Management
- Customer Service
- Information Analysis
