DRYice[®]

A975 DISCS AND ROLLS

Take Sanding to the Next Level

Utilizing Norton patented SG ceramic grain, Dry Ice A975 offers the technician a faster cutting product that significantly out-produces and outlasts conventional abrasives. A water-based stearate No-Fil coating provides maximum load resistance, further extending the life of the product.

The incredible versatility of Norton Dry Ice is perfect for refinishing any job, including those that contain scratch-resistant clears and E-coats, composites and aluminum, eliminating the need for specialty products.

Work Smarter. Finish Faster.

**CONVENTIONAL FINISHES, COMPOSITES,
SCRATCH RESISTANT CLEARS, AND ALUMINUM**

NORTON

SAINT-GOBAIN

FEATURES

- Patented Norton SG ceramic grain
- Unique fibre-reinforced latex/paper backing
- Water-based stearate (No-Fil)

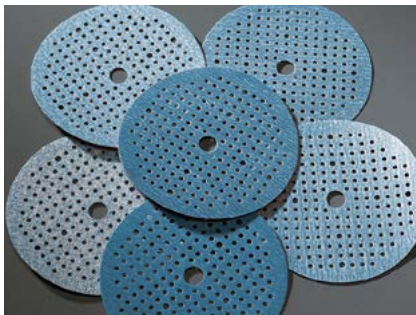

BENEFITS

- Superior cut on abrasion-resistant paints and clears
- Quicker/cooler cut with better longevity
- Flexible and easy removal with maximum tear resistance
- Increased durability
- Improves load resistance
- Extends life

A975 DISCS AND ROLLS

Dry Ice is perfect for refinishing any job, especially those that require an extremely durable abrasive that cuts quicker, cuts cooler, and lasts longer without generating heat. Our engineered ceramic grain is the perfect abrasive for any job, including those with scratch-resistant clears and E-coats, composites and aluminum. Its versatility eliminates the need for additional specialty abrasives.
